

For Immediate Release

Vaughan, Ontario - For Immediate Release – March 24, 2006

Your Solar Home Inc. introduces SolarSheat 1500GS modular solar system for solar air heating.

Toronto, ON March 24, 2006: Your Solar Home Inc., today introduced a second glazed version of its popular modular SolarSheat solar air heating system. The product is branded the SolarSheat 1500GS.

The SolarSheat 1500GS is designed for whole house heating applications like its companion self powered product The SolarSheat 1500G. The SolarSheat 1500GS is a secondary system that can be used alone, in an array with an external fan and control system powered by solar or AC.

The SolarSheat 1500GS allows anyone to configure the system for one room or whole house heating applications by sizing larger fans and control systems. The SolarSheat 1500GS is the first product available in the SolarSheat series of products that allows contractors and builders to quickly configure size the system using a foam back and template system. The SolarSheat 1500GS can be connected together using the modular framework and mounting system available from Your Solar Home.

“We have had excellent results from our customers using the SolarSheat 1500G series product and The SolarSheat 1500GS will continue to deliver high performance heating at a better price performance ratio for multiple panel systems. Contractors and consumers will easily be able to build and configure their systems” said Todd Kirkpatrick company founder and president.

Natural gas rates have risen 136% over the last 5 years and are projected to increase again in the next upcoming heating system for 2006/2007. “Consumers continue to have very little choice in saving on their energy bills. Window upgrades, extra attic insulation, high efficiency furnaces, programmable thermostats and sealing leaky spots on doorways have been done in a lot of cases. Solar air heating is an inexpensive way to provide significant savings for consumers. The monthly bill is out of control and The SolarSheat 1500GS is the perfect product for domestic supplemental heating.” says Kirkpatrick.

The SolarSheats added benefit it’s environmental savings. Each panel reduces CO2 emissions by .35 tonne helping with the every growing greenhouse gas problem on our planet.

The SolarSheat 1500GS will be shipping by March 31, 2006 in limited quantity.

Your Solar Home Inc. is a Canadian company located in Vaughan, Ontario and manufactures solar air, ventilation and furnace heating systems for residential and industrial use. The SolarSheat product line is available from Your Solar Homes authorized partners throughout Canada and the United States.
