**YOUR SOLAR HOME INC., ANNOUNCES 1000G SOLARSHEAT
SOLAR AIR HEATER FOR SMALL SPACES.**

Toronto, ON, June 8, 2007: Your Solar Home Inc. a leading manufacturer of solar air heating and ventilation systems has announced the SolarSheat 1000G glazed solar air heater for small room heating applications.

The SolarSheat 1000G is a smaller version of the 1500G modular solar air collector that provides supplemental solar air heating for smaller spaces in homes, cottages and businesses. The SolarSheat 1000G solar air collector can be installed in areas where there may not be enough wall or roof space to accommodate the 1500G/S series solar air collectors. The SolarSheat 1000G can be installed easily and quickly by one person due to the manageable weight and size of the product. Larger room heating needs are accommodated by adding the SolarSheat 1500G's or 1500GS's series to the smaller footprint of the SolarSheat 1000G.

"The SolarSheat 1000G really addresses the space limitation that homeowners have when thinking about adding solar to their homes," says Todd Kirkpatrick, President and CEO of Your Solar Home Inc. The SolarSheat series of products are already one of the most high quality, durable and affordable complete solar solutions on the market today and the SolarSheat 1000G is even more affordable with all the same quality of the 1500G.

The SolarSheat 1000G is also SRCC certified and gives consumers the satisfaction that the SolarSheat has had independent testing by a certified laboratory. The SRCC (Solar Rating and Certification Corporation) allows consumers to utilize some of the tax incentives for purchasing solar space heating products.

Solar air heating is an inexpensive way to provide significant savings for consumers. Space heating on average is 61% of the annual energy bill. Solar air heating using the SolarSheat is a way for consumers to save on their annual heating costs while at the same time help fight climate change. The SolarSheat collector saves annually .18 tonne per collector/yr of CO2 emissions.

Your Solar Home Inc. is a Canadian company located in Vaughan, Ontario and manufactures solar air, ventilation and furnace heating systems for residential and industrial use. The SolarSheat product line

is available from Your Solar Homes authorized partners throughout
Canada and the United States.
