YOUR SOLAR HOME INC. Signs Distribution Contract and Direct Sales Relationship with Xcel Energy

VAUGHAN, Ontario – Your Solar Home Inc., a leading manufacturer of solar air heating and ventilation systems, announced today that Xcel Energy will distribute and sell the SolarSheat product family in Colorado through its HomeSmart program.

The SolarSheat family of collectors can provide supplemental space heating for a single room to a whole house. The SolarSheat product is a very simple and cost effective renewable energy source that can offset the high cost of heating a home.

“Home heating costs have gone up dramatically in the last three years, and people generally have very few options when trying to reduce energy usage,” said Todd Kirkpatrick, president and CEO of Your Solar Home. “The SolarSheat can help mitigate the cost of using fossil fuel while reducing CO₂ emissions. It’s a ‘win/win’ for the consumer and the environment.

“We are extremely pleased to have a utility partner such as Xcel Energy distributing and selling the SolarSheat family of products through its HomeSmart program,” said Kirkpatrick. “Having access to the SolarSheat product family gives Xcel Energy customers a way to save money on their monthly heating bills while preserving the environment.”

Paul Olivier, general manager of HomeSmart, an unregulated division of Xcel Energy, said, “This is a continuation of our efforts to provide energy saving options for our customers.”

The SolarSheat family of products is certified by the Solar Rating and Certification Corporation (SRCC) and gives consumers the satisfaction that the SolarSheat has had independent testing by a certified laboratory. The SRCC certification enables consumers to utilize some of the tax incentives for purchasing solar space heating products.

Solar air heating is an inexpensive way to provide significant savings for consumers. Space heating on average is 61 percent of the annual energy bill. Solar air heating using the SolarSheat is a way for

consumers to save on heating costs while at the same time helping to fight climate change.

Your Solar Home Inc. is located in Vaughan, Ontario, and manufactures solar air heating and ventilation systems for residential and industrial use.
