YOUR SOLAR HOME INC. RECEIVES SRCC CERTIFICATION FOR SOLARSHEAT SOLAR AIR COLLECTORS

Toronto, ON June 5, 2007: Your Solar Home Inc., Solar Ratings and Certification Corporation approves SolarSheat solar air collector for SRCC OG-100 program.

Your Solar Home Inc. a leading manufacturer of solar air heating and ventilation systems is pleased to announce that the Solar Rating and Certification Corporation (SRCC) has approved its SolarSheat solar air heating collectors for SRCC OG-100 certification.

The SolarSheat is a modular glazed solar air system that provides supplemental solar air heating to homes, cottages and businesses. The SolarSheat solar air collector series of products can be easily configured to provide heating for a single room, multiple room or whole house application. Additionally, small industrial systems up of to 10 SolarSheats can be configured to provide supplemental heat to businesses or shops.

We are very pleased that Your Solar Home Inc. has been approved by the SRCC for SRCC OG-100 Certification. 'This legitimizes the SolarSheat as a professional class solar energy product' said Todd Kirkpatrick, company President and CEO of Your Solar Home Inc. Consumers can now utilize some of the tax incentives for application of solar thermal heating applications and that makes the SolarSheat collector even more affordable.

'The objective for us is to provide consumers with the most affordable, durable and easily installed solar thermal energy product on the market. The SRCC OG-100 rating gives us independent test results from a ratings laboratory', says Kirkpatrick. All four models of the SolarSheat are approved for certification, SolarSheat 1500G, 1500GS, and the new forthcoming 1000G and 1000GS collectors. For more information on ratings visit the SRCC website www.solar-rating.org/ratings/ratings.htm or www.yoursolarhome.com.

Solar air heating is an inexpensive way to provide significant savings for consumers. Space heating on average is 61% of the annual energy bill. Solar air heating using the SolarSheat is a way for consumers to

save on their annual heating costs while at the same time help fight climate change. The SolarSheat collector saves annually .35 tonne per collector of CO2 emissions.

Your Solar Home Inc. is a Canadian company located in Vaughan, Ontario and manufactures solar air, ventilation and furnace heating systems for residential and industrial use. The SolarSheat product line is available from Your Solar Homes authorized partners throughout Canada and the United States.

Your Solar Home Inc. is a Canadian company located in Vaughan, Ontario and manufactures hybrid heating and ventilation systems for residential and industrial use.
