

SolarSheat Attic Kit 1009

Use this kit where solar is the only option and extra duct work is required. This kit is required when added flow is needed for a roof mount G series collector with an attic.

Parts List

- 25' of insulated duct
- PV 14W head with end mounts
- 2 ceiling diffusers
- 25' of insulated thermostat wire
- DC 5" fan with collars
- sensor 20°C / 70°F
- butt connectors
- schematic – wiring diagram

*possible to substitute insulated sheet metal duct
